New Multi-Position Hose Hangers for Trucks & Cube Vans

The Butler Corporation is pleased to announce it has developed a new Multi-Position Hose Hanger System for trucks and cube vans. The new system is designed to conveniently organize and store large quantities of vacuum and pressure hose. Hangers attach to heavy-duty horizontal cross members that can be raised or lowered on vertical up-rights which are permanently mounted to the cargo box, and when not in use, can be easily folded against the wall. Hangers, cross members and uprights are constructed of steel with a silver texture finish. The new Multi-Position Hose Hanger System is available as an optional feature when purchasing a new Butler System, or as an add-on for existing Butler Systems.
