## Introducing Our New Electric Pressure Hose Reel

The Butler Corporation is pleased to announce it has developed a new Electric Pressure Hose Reel. Our new Electric Pressure Hose Reel is made to the exact specifications as our manual reel. It utilizes the same floor space, holds the same 200' of hose and is driven by a proprietary, permanently lubricated, gear driven motor with a simple "push to activate" switch. The new reel is now available for all new Butler Systems as an Optional Feature or can be purchased separately for existing Butler Systems.

### Electric Pressure Hose Reel

- Aluminum construction with Teflon® bushing glides
- Located at side or rear door opening
- Continuously live (remove length of hose required and remainder stays attached on reel)
- Storage capacity for 200' of high-pressure hose
- Drag brake allows for tension adjustment
- Brass quick disconnect for easy removal of pressure hose from reel
- Designed to utilize minimum amount of floor space
- Direct drive system eliminates belts or chains
- Permanently lubricated gear drive motor
- Silver texture finish

Price: **\$795.00** (when ordered in place of regular Pressure Hose Reel) Factory installation included. **\$1,595.00** (If purchased individually)

NOTE: Vehicle may be equipped with two (2) sets of Pressure Hose and Vacuum Hose Reels. \*Second set of reels available at individual prices only.
