New Dual Hose Storage and Tie Down System for Trucks and Cube Vans

The Butler Corporation is pleased to announce it has developed a new Multi-Position Dual Hose Storage and Tie Down System for trucks and cube vans. The new system is designed to conveniently organize and store large quantities of vacuum, pressure and supply hoses. Brackets that can be multi-positioned attach to heavy-duty horizontal cross rails. The rails can be raised or lowered on the vertical up-rights which are permanently mounted to the cargo box. Tie Downs (eye hooks) that can be multi-positioned are also attached to a heavy-duty cross rail and used for securing heavy items. Brackets, Tie Downs, cross rails and uprights are constructed of steel with a silver texture finish. Two (2) Dual Hose Storage Brackets and Two (2) Tie Downs are provided as standard equipment.

NOTE: When optional shelving is added, multi-position brackets are attached to the shelving and Tie-Downs positioned where convenient.
