New Truck and Cube Van Rear Cargo Heater

The Butler Corporation has developed a new compact rear Automatic Cargo Heater for Trucks and Cube vans. This new compact Cargo Heater utilizes the heat from the vehicle's coolant system to help protect items in the cargo area from freezing. The new Cargo Heater can be automatically set to turn on when the vehicle's engine is running and the Butler System is not in use. Heater is available as an option when purchasing a New Butler System in a truck or cube van, or as an add-on accessory for Butler Systems installed in older trucks and cube vans.

Please call us at **800.535.5025** or visit our website
